SUMMARY

B.Tech Computer Science student architecting production-ready Generative AI and Machine Learning systems. Specialized in LLM orchestration, high-dimensional data engineering, and hybrid AI architectures. Proven ability to bridge probabilistic NLP models with deterministic classifiers to deploy highly accurate, zero-hallucination serverless applications.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, SQL

AI & Machine Learning: Generative AI, LLMs, RAG, Computer Vision (YOLOv8, CNNs), NLP, Transfer Learning

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-Learn, Hugging Face, LangChain, OpenCV, NumPy, Pandas, Keras

PROJECTS

Heal Bridge — AI Medical Triage Platform

Mar 2026 – Jul 2026

Hybrid AI Architecture & Serverless Inference

Python, LLMs, RAG, FastAPI

- Architected a dual-engine triage combining Llama-3 prompt-chaining with deterministic ML to eliminate hallucinations.
- Engineered out-of-core Naive Bayes classifier on 1M+ records, mapping clinical JSON schemas to sparse matrices
- Orchestrated serverless geospatial routing using the Overpass API and Haversine formula for emergency clinical localization.

Real-Time Edge Biometric Gait Recognition System

Dec 2025 – Mar 2026

Real-Time Computer Vision & Edge Inference

PyTorch, OpenCV, Transfer Learning

- Architected a decoupled, multithreaded OpenCV pipeline to process video sequences, utilizing YOLOv8 for spatial segmentation.
- Resolved training-serving skew via temporal voting, achieving 98% accuracy on CASIA-B (124 subjects, 11 angles).
- Fine-tuned a Xception backbone in PyTorch, optimizing deep spatial feature maps to isolate view-invariant walking dynamics.

Brain Tumor Detection System

Nov 2024 – Apr 2025

Deep Learning Image Classification

TensorFlow, Transfer Learning, Flask, CNN

- Trained VGG16 and ResNet50 architectures via transfer learning to perform robust, multi-class MRI classification.
- Deployed a Flask REST API for real-time inference, achieving 96%+ test accuracy and a 0.94 weighted F1-score.
- Implemented CLAHE image augmentation to standardize MRI datasets and enhance feature extraction for deep learning models.

EXPERIENCE

AI Research Intern

Apr 2025 – Jul 2025

CodingJr

Remote

- Researched and integrated transformer-based Large Language Models (LLMs) to build contextual, high-retention chatbots.
- Developed automated NLP evaluation pipelines and fine-tuned generation algorithms for production AI deployment practices.

EDUCATION

VIT Bhopal University

Bhopal, India

B.Tech in Computer Science and Engineering (Current CGPA: 8.80 / 10)

Jun 2023 – Present

Jawahar Navodaya Vidyalaya

Bilaspur, India

CBSE Class XII (84.4%) | CBSE Class X (92.8%)

2020 – 2022

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Coursera: The Bits and Bytes of Computer Networking
